

◀ 4 knife disc with 4 chip throwing paddles, for quick chipping and a lot of blowing power.

Te Beever M12D is equipped with hydraulic spring assisted down pressure. ▶

Beever M12D

Infeed with single (top) feed wheel, 457 mm in diameter, and straight, flow-through infeed design. ▶

Technical details:

Details:	Beever M12D
chipping principle	disc
max. chipping diameter	12" (305 mm)
capacity chips	30 m ³ /h
wood chips length	19 mm
feed rate	80 FPM (24,3 MPM)
drum	Ø 940 mm, 51 mm thick
number of knives	4
vertical counterknife	1
power	84 - 114 HP
infeedopening	457 x 381 mm
funnelopening	1295 x 736 mm
feedwheel	Ø 457 mm x 355 mm wide
weight	± 2400 kg

The Beever M12D is a heavy duty mid-range chipper. The 360° turn able discharge chute is height adjustable and outfitted with easily adjustable deflector with four locking positions. Due to its big diameter, the single top compression roll climbs easily on to the wood, which results in the ease of feeding the material to the disc.

All components of the Beever M12D are very accessible for use and maintenance.

An ideal machine for rental companies, municipalities, tree care companies and anyone who needs to chip wood.

Standard Equipment:

automatic feed system; hydraulic and fuel sight gauges; lockable tool box and tanks; tongue jack with stationary foot pad; variable speed flow control;
