

Beever M8D PTO

Technical details:

Details:	Beever M8D PTO
chipping principle	disc
max chipping diameter	8" (203 mm)
power required	25 - 50 HP
weight	± 1000 kg
capacity hydraulic tank	30 liter

The Morbark Beever M8D PTO is the smallest PTO chipper made by Morbark. This heavy duty unit is build with the same strength and durability like all other Morbark chippers, made to serve a life time.

Important feature of the Beever M8D PTO is multiple positions to attach a three-point hitch so it will fit behind any tractor.

Self-contained hydraulic components eliminate the need to attach hydraulic hoses to the tractor.

Standard Equipment:

automatic feed system; hydraulic sight gauge; variable speed flow control; folding infeedtray; turnable discharge chute;

Technical details:

Details:	Beever M12R PTO
chipping principle	drum
max chipping diameter	12" (305 mm)
power required	50 - 85 HP
weight	± 1500 kg
capacity hydraulic tank	60 liter

The heavy duty Morbark Beever M12R PTO is mounted on a heavy duty pedestal stand and equipped with self-contained hydraulics. It becomes a durable chipper with the same feed rate as the Model Beever M12R with it's own engine.

The Morbark PTO chippers make brush disposal safe and easy and are less expensive than trailerized units and just as productive.

Standard Equipment:

automatic feed system; hydraulic sight gauge; variable speed flow control; folding infeed tray; turnable discharge chute;
