Morbark Wood Hog 3800 Forest

OBM Pro 270XL

Buitenpost, 31 March 2010

Dear Sir/Madam,

Every company in the recycling business is on the look-out for improvements and innovations to optimize their products and services. This allows timely responses to market developments and ensures sustained competitiveness and profitability.

One development of key interest today is the need of chip users to produce or access the most uniform wood chip possible.

For this, OBMtec-RTE offers you the solution in the form of disc chippers by Morbark and Peterson. These quality machines combine exceptionally high capacity with the ability to produce a constantly uniform chip.

Something for you? Then OBMtec-RTE has good news:

To convince you that disc chippers produce the very best quality wood chips, we invite you to come see these machines at the Forst Live trade fair in Offenburg.

At the fair, OBMtec will be demonstrating the Peterson 5900 chipper. Logs up to 56 cm are shredded into 22 mm chips, and if desired the chip size can be reduced to just 6 mm!

And if you want even more power, we would be pleased to tell you all about the Morbark 30: 1050 HP, shreds trees up to 75 cm in no time into 25-50 mm wood chips. In quality and productivity the absolute top of the market!

But OBMtec-RTE has more innovations in house:

At the Bauma we will unveil a world premiere: a Caterpillar-driven horizontal shredder, complete with a crane, that can be transported quickly and easily as a trailer. A real 1-operator machine with unique features. Curious? Come on to the OBMtec-RTE booth and let us inform you about the capabilities of this new concept!

Our next premiere is the PRO 270XL Stump Grinder: tractor-driven, with a 1200 mm cutting wheel with a unique chisel system, suitable for power up to 270 HP. A top-notch machine!

It should by now be clear: If you want to stay informed of the latest developments, we are pleased to welcome you at Forst Live, 9-11 April, booth number 520, and/or at the Bauma, 19-25 April, booth number N1015/7!

Hoping to see you at one of these events.

The OBMtec-RTE Team.

Peterson.
